

## California Meter Usage Certification

Note: It is a misdemeanor to install a meter in California without having it inspected by the county Weights & Measures office if the meter will be used to charge a tenant for power consumed based on the meter reading. It is also a misdemeanor for Davidge Controls to knowingly sell a meter that will be used for revenue purposes without notifying the appropriate Weights and Measures office.

This certification applies to the following meter(s):

Model \_\_\_\_\_ Quantity \_\_\_\_\_

Ordered by: Company: \_\_\_\_\_

Name: \_\_\_\_\_

Address: \_\_\_\_\_

\_\_\_\_\_

Phone: \_\_\_\_\_

Please check one of the first three boxes below.

- These meters will not be used for revenue billing in the state of California. (If you check this box, skip the rest of this form except for the signature.)
- These meters should be sent to the Weights and Measures office for \_\_\_\_\_ County.
- I will take the meters directly to the Weights and Measures office for testing. Note: The law requires that all meters submitted for testing be submitted by a Registered Service Agency. Some offices ignore that requirement and some allow the owner to submit them for testing.

The meters will be installed at the following address in \_\_\_\_\_ county:

- 
- I will have the county Sealer (Weights & Measures official) place the meters in service.
  - I will have a licensed Service Agent from Davidge Controls visit the site after the meters are installed, inspect the installation and place the meters into service by applying a tag on each one and filing the appropriate papers with the county Weights and Measures office. (\$75.00 per hour, door to door, plus travel expenses.)

Fax to (805) 688-2389 or
